Stone-stacking: cool or cruel?

adapted from an article by Patrick Barkham

- 1 On a trip to visit his father in Orkney, John Hourston, the founder of marine campaigners the *Blue Planet Society*, was dismayed to find wild beaches dotted with stacks of stones. His tweets have triggered an unexpectedly heated debate during which he's been belittled as a killjoy, a pedant, and even a misanthropist. "If stone stacks infuriate you, just knock them down. Plenty of people do. Besides, what next? Ban sandcastles? Let's focus on plastic in the oceans, people!"
- 2 Of course, stone-stacking is an ancient and sometimes religious impulse. A cairn in Scotland is a memorial to someone lost, but also a pile of stones that marks a way through wild country: invaluable when the cloud comes down. Cairns keep us safe. More recently, stone-stacking has become an art form and a competitive sport. Artists say the absorbing process of handling and balancing cool stones is meditative and good for our mental health. Children love it.
- 3 But what Hourston's critics don't seem to grasp is the almost industrial scale of this new age of stone-stacking. Adventure tourism and social media have created a perfect storm of stones. Cruise ships decant visitors on to once remote islands such as Orkney, the Faroes or Iceland, each passenger burning with a creative desire to memorialise their sightseeing on Instagram.

"Where do you draw the line?" wonders Hourston. "Orkney, Shetland, Iceland, Svalbard, or the Antarctic peninsula? We should start drawing the line now."

- 4 Our personal monuments turn empty landscapes into peopled places. When we reach a remote summit or deserted beach, we know people have stepped there before, but for a moment we can enjoy a place where humans do not predominate. No longer. Stacks are an intrusion, an offence against the first and most important rule of wild adventuring: leave no trace.
- 5 Stone-stacking can also harm wildlife. Birds such as oystercatchers make their nests on stony shores. These superbly camouflaged scrapes are almost impossible to see, and stone-stackers can unwittingly destroy a nest in the breeding season. On other sites the moving of stones exposes soil and exacerbates erosion, destroying the cool undersides of stones that are sanctuaries for millions of invertebrates.
- 6 Hourston was particularly struck by stacked stones on Skaill beach, immediately below the neolithic village of Skara Brae. It's not fanciful to fear that ancient ruins may be disturbed. Historic England last year warned that stone-stacking was putting at risk historic monuments such as neolithic Stowe's Pound in Cornwall. We can be prosecuted for stone-stacking — destroying an ancient monument — in the wrong place.
- 7 Is there ever a right place? I'd say yes. A stack of stones below the high-tide line on a well-visited beach is as harmless and ephemeral as a sandcastle. Just as there are graffiti walls, we could designate certain beaches or moors as permitted places for stone-stacking. Stone-stacking contests are obviously fun too.
- 8 Some will rail against more rules, or more self-restraint; 17, particularly when there are more than 7 billion of us. Sheer quantities of people turn inconsequential behaviour into acts with consequences. If we want to enjoy what's left of our wild world, we have to be more aware than ever of our impact upon this Earth.

Tekst 5 Stone-stacking: cool or cruel?

- 1p 12 What idea does the sentence ‘Let’s focus on plastic in the oceans, people!’ (paragraph 1) illustrate?
- A An overly emotional protest against stone-stacking will achieve nothing.
 - B Many people consider the practice of stone-stacking to be an inalienable right.
 - C Some people think that it is futile and trivial to worry about stone-stacking.
 - D Stone-stackers are reluctant to admit that their hobby can offend others.
- 1p 13 Which of the following characterises paragraph 2?
- A It further elaborates on the negative aspects of stone-stacking.
 - B It outlines the various uses of and reasons for stone-stacking.
 - C It puts the topic of stone-stacking in a global perspective.
 - D It questions whether arguments against stone-stacking are valid.
- 1p 14 Which of the following becomes clear about stone-stackers from paragraph 5?
- A They are concerned about the extinction of some birds and insects.
 - B They do not care that their activities damage valuable ecosystems.
 - C They have a preference for building stacks in remote natural areas.
 - D They may disturb habitats of animals without even being aware of it.
- 1p 15 Geef van de volgende beweringen aan of deze overeenkomen met de inhoud van alinea 6.
Noteer ‘wel’ of ‘niet’ achter elk nummer op het antwoordblad.
- 1 Het is mogelijk dat stenen uit een archeologische vindplaats zijn weggehaald om te stapelen.
 - 2 ‘Historic England’ wil dat het stapelen van stenen verboden gaat worden.
- 1p 16 What is the purpose of paragraph 7?
- A to give examples of activities that are comparable to stone-stacking
 - B to make clear why stone-stacking has become such a popular activity
 - C to stress that some disagree with Hourston’s views on stonestacking
 - D to suggest localities in which stonestacking is an acceptable pastime
- 1p 17 Which of the following fits the gap in paragraph 8?
- A and right they are
 - B but we need both
 - C so expect change
